

Geoengineering Free Canada GFC is a national coalition which provides a comprehensive source of information, support and opportunities for people to learn about chemtrails and to work together to put an end to unsafe geoengineering practices. The coalition convenes regularly with Canadian and global action groups, guest speakers and advisers to improve collaboration and to achieve successful actions.

Geoengineering Free Canada GFC - How to Build An Action Group within the Coalition

How To Build An Action Group

<https://www.indeed.com/career-advice/career-development/steps-to-building-a-successful-team>

Action groups build community, encourage research, promote involvement and collaboration and coordinate and carry out strategic actions. Successful action groups build capacity and effective strategies by incorporating opportunities to connect regularly at planning meetings.

To ensure all newly formed groups are uploaded to our coalition data base to receive the latest news and participate in all events, group leaders are requested to distribute the links below to their membership and friends.

- **Subscribe to receive our newsletter and zoom invitations at: <https://www.canadaforfreedom.info/geonegineeringfreecanada>**
- **Geoengineering Free Canada on Telegram: <https://t.me/+VzYn4J8zE3s2YjRh>**
- **Geoengineering Free Canada on Facebook: <https://www.facebook.com/groups/1780830142282917>**

Steps for Forming an Action Planning Group In Your Area.

1. Discuss and analyze the group's objectives and determine its needs.

Groups must be specific about what needs to be accomplished. After the needs have been determined, the group must consider the best approach to meet the identified needs. Groups must ask the following questions: *What are we trying to accomplish? What are our community's strengths and needs? What are the pros and cons associated with the proposed collaboration? What are our objectives and what types of activities seem logical?*

1. Recruit the right people.

The group's objectives will prescribe the type of group developed. Some groups may choose to start small to accomplish specific tasks and then strategically expand. Depending on the needs of the group, either program directors or front-line staff should be encouraged to attend. In addition, invite community members, youth leaders, and politicians. The size of the group matters. *It takes large groups longer to define and agree on common objectives and activities. Yet large groups may have access to greater resources that may be required for accomplishing certain tasks.*

1. Adopt more detailed activities and objectives suiting the needs, interests, strengths, and diversity of the membership.

A key to a successful group is the early identification of common goals and benefits of working together. An important consideration for adopting specific activities is to identify some short-term outcomes. *For example, if a groups objective is to increase*

public knowledge about geoengineering in their region, a short-term outcome could be to launch an educational group on social media or to publish two editorials in local newspapers.

1. Convene group members.

A group can be convened in person or by zoom at a meeting, workshop or conference. The core committee should plan the first meeting using a time-specific prepared agenda, a comfortable and well-located meeting area. It is appropriate to prepare a draft mission statement (charter) and proposal for coalition structure and membership. How to conduct a meeting and create an agenda can be found at: <https://www.skillsyouneed.com/ips/conduct-meeting.html>

Invitations which include the group charter, meeting goals, date, time and locations can be distributed by email, social media, telephone and in person door to door and at events. *Anticipate that not all invited members will become coalition members.*

1. Develop budgets and map resources and needs to keep the group up and running and to handle detail work.

Though groups can usually run on a minimal budget, each member's time is a valuable contribution.

1. Devise the group's structure***

Structural issues of the group include:

how long the coalition will exist, meeting locations (in person and online), meeting frequency and length, decision making processes, meeting agendas, membership rules, and participation between meetings by subcommittees or planning groups. Templates of different group structures should be collected prior to the meeting and presented for discussion to reduce the time needed to make management decisions.

1. Plan for ensuring the group's vitality.

Methods for noting and addressing problems, sharing leadership, recruiting new members, providing training on identified needs, and celebrating success can help ensure a group's viability and success. It is very important to recognize both the individual and organizational contributions to a group each step of the way.

1. Evaluate programs and improve as necessary.

Each group activity and event should include evaluations which can be carried out through discussions or satisfaction surveys.

Geoengineering Free Canada is a federal coalition which provides a comprehensive source of information, support and opportunities for people to learn about chem trails and to work together to put an end to unsafe geoengineering practices. The coalition convenes regularly with Canadian and global action groups, guest speakers and advisers to improve collaboration and to achieve successful actions.

Welcome (Name) to Geoengineering Free Canada GFC and thank you for volunteering to become a leader of an action group in your area.

Enough is Enough! Ocean 2 Ocean is TAKING PROVINCIAL AND FEDERAL ACTION!

We changed our name to Geoengineering Free Canada and are inviting already formed action groups and advisers across Canada and across the globe to our data base and inviting Canadians to form Chemtrail/Geoengineering action groups to join in. Over the next month, group leaders and advisers will be sent invitations to join their first GFC coalition zoom meeting.

Geoengineering Free Canada is a federal coalition which provides a comprehensive source of information, support and opportunities for people to learn about chemtrails and to work together to put an end to unsafe geoengineering practices. The coalition convenes regularly with Canadian and global action groups and guest speakers and advisers to improve collaboration and to achieve successful actions.

Group Leaders: As we build our groups across the country, all group leaders, guest speakers and advisers will be invited to join in on monthly Geoengineering Free Canada zoom meetings where we can learn more, exchange action strategies and ideas and ask questions. Group leaders are also highly encouraged to meet regularly at planning meetings as a separate action group. Check out why by reviewing our “How to Form an Action Group Guide” copied below and also attached.

As a coalition, our goal is to provide the most comprehensive and up to date information and offer opportunities for all groups to share strategies and work together. To enable us to serve your group best, we request group leaders share their group contact details so all groups can participate in all events.

If you haven't done so, please email your group leaders' contact emails (if more than one), along with your group name, group contact details and website and social media links (if and when created) to: geoengineeringfreecanada@proton.me

We will upload your details to coalition data base and newsletter and zoom meeting distribution lists to enable all group leaders and advisers to participate in all monthly zoom meetings and federal actions and events.

To enable us to promote your events and help better serve all groups and group members, we request your permission to allow us to upload your group contact details and links to the GFC website. Your group membership will then be enabled to subscribe to all social media sites as they form and join in on all coalition zoom meetings every 3 months which will feature expert speakers and advisers as well as other zoom meetings which participating groups will offer.

Please share our website and social media links with your groups so that your membership can subscribe to receive our newsletters and zoom invitation links at: <https://www.canadaforfreedom.info/geoneengineeringfreecanada>
Telegram link. <https://t.me/+VzYn4J8zE3s2YjRh>

Group leaders can also sign up their membership to the coalition data base by attaching our Email Sign up list to their group emails or by providing a sign up list at meetings and events. Please find Data/Email lists attached.

We already have groups across Canada signed up and more are forming each day, so please spread the word.

In the meanwhile, please continue to build awareness and share the best information archive in the world related to chemtrails, geoengineering and weather modification:

<https://connect.climateviewer.com/> Jim Lee, the founder and moderator of this website along with other expert speakers will join us at feature events soon.

By working together, we will achieve the greatest success in freeing Canada from harmful geoengineering practices. We are the ones we've been waiting for.

In Solidarity,
Geoengineering Free Canada Administration

Check out our Website: Geoengineeringfreecanada.com

Note: Our website will be totally revised by the end of November and more social media sites will be up and running by the end of this month.

Dear (Name)

Thank you for offering to volunteer your time and skills with Geoengineering Free Canada. We appreciate your willingness to help out.

All members subscribed to receive our electronic newsletter will be invited to join our first coalition zoom meeting on Monday December 12th at 6:00 PM PST, 7:00 PM MST, 9:00 PM EST. So, if you haven't subscribed, please sign up at: <https://www.canadaforfreedom.info/geoneengineeringfreecanada> . *We also invite you to share this link with your friends along with our telegram and Facebook links located at the bottom of this page. Please sign up and share.*

Weather modification technologies being used locally and globally are of increasing concern to Canadians who've become aware of the health and environmental impacts. As a result, Geoengineering Free Canada is growing quickly and taking action by coordinating a coalition of groups which can share sourced information and action strategies rapidly through our social media sites, website, newsletter and zoom meetings and live events which will feature expert speakers.

We're encouraging volunteers to take charge by forming local, regional and/or provincial action groups which can coordinate local educational events and strategic nonviolent actions. All volunteers are also invited to continue to build awareness and to share their research, events and strategies with us. Our team is committed to advertising these events and actions and we have also committed to coordinate live events across Canada as we move forward.

More Ideas:

- 1) Attached are instructions on how to organize a group. More information be found by searching in brave and at: <https://www.indeed.com/career-advice/career-development/steps-to-building-a-successful-team>
- 1) There are thousands of strategic actions people can carry out. Attached are but some ideas. More can be found in our social media sites, newsletter, though online engine searches and in e-books like: HOW NONVIOLENT STRUGGLE WORKS, by Gene Sharp
<https://www.aeinstein.org/wp-content/uploads/2015/01/HNVSW-updated-Jan-2015.pdf>
- 1) Take photos of chem trails and cirrus clouds – Add the following details to each image: Location, date and time. Organize the images in a file and upload the best images to our social media sites.
- 2) Organize a water testing team for your area.
- 3) Our administration team is also interviewing volunteers with the following expert skills: If you have the following skills, please email us: videography, media, public speaking.

Thank you and welcome to our coalition.

In Solidarity,

Geoengineering Free Canada Administration

Our website is under construction and will be launched within a few weeks.

Geoengineering Free Canada is a federal coalition which provides a comprehensive source of information, support and opportunities for people to learn about chem trails and to work together to put an end to unsafe geoengineering practices. The coalition convenes regularly with Canadian and global action groups and guest speakers and advisers to improve collaboration and to achieve successful actions.

Health Issues and Symptoms

- **Aneurysms** - Components of chemtrails are believed to block arteries and weaken arterial walls leading to aneurysms and eventually to deadly strokes.
- **Strokes** - Nano-particle aluminum builds up in capillaries causing blockages eventually leading to aneurysms and strokes.
- **Heart Attacks** - Barium dramatically lowers potassium in mammals leading to heart fibrillations and heart attacks. In fact, barium is used in animal testing to artificially induce heart attacks.
- **Cancer** - Most of the components of chemtrails suppress the immune system. When the immune system is suppressed for extended periods, cancer grows and thrives.
